DETAILED ACTION

1. **Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4315. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-8, drawn to method of reducing inflammation, classified in Class 424, subclass 282.1.

II. Claims 9, 13, and 14, drawn to method of blocking mast cell degranulation or treating inflammatory diseases in which mast cells play a role, classified in Class 424, subclass 282.1.

III. Claim 10, drawn to method of treating allergic blepharoconjunctivitis, classified in Class 424, subclass 282.1.

IV. Claims 11 and 12, drawn to method of treating Type 1 hypersensitivity, classified in Class 424, subclass 282.1.

V. Claim 15, drawn to method of analyzing botulinum toxin, classified in Class 435, subclass 4.

VI. Claim 16, drawn to method for the reduction of photophobia, classified in Class 424, subclass 282.1.

3. Groups I-VI are different methods. These inventions require different reagents acting through different process steps with different modes of operation and different endpoints. The different diseases have different etiologies, pathologies, and outcomes, and thus claims drawn to methods of treating said diseases would require separate and distinct searches. Therefore they are patentably distinct.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Any inquiry concerning this communication from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (703) 308-9805. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.
